

POSITION, LOCATION AND NAVIGATION (PLAN) GROUP NEWS RELEASE

8 February 2011

Congratulations to Dr. Elizabeth Cannon, member of the PLAN Group in the Department of Geomatics Engineering and President of the University of Calgary, for her election to the (U.S.) National Academy of Engineering, for her innovative use of GPS data for a wide range of applications and for pioneering the field of geomatics.

Election to the National Academy of Engineering is among the highest professional distinctions accorded to an engineer. Academy membership honors those who have made outstanding contributions to "engineering research, practice, or education, including, where appropriate, significant contributions to the engineering literature," and to the "pioneering of new and developing fields of technology, making major advancements in traditional fields of engineering, or developing/implementing innovative approaches to engineering education."
